Compliance & Reporting

B2GCLOUD.COM Customized Automated Cloud Based Compliance Reporting: MODULES

We **custom design** and manage all of your **CFR** compliance and reporting for **federal, state and local** requirements . We have been **cloud based since 2009** with customizable automated real time modular reports for owners, primes, subs and stakeholders. We create **_Transparent, Defensible, Processes_** for tracking bids, managing utilization, monitoring, reporting and contract performance while establishing true capacity **KPI's**. Our service includes; contractual terms and conditions, **FEMA compliance monitoring and reporting**, **Davis Bacon**, **Certified Payroll** and **OCIP compliance and reporting**.

Our software is tested, interfaces with all other software applications and is modular and easy to use. As a **_Cloud Based_** provider we can provide service in any part of the world at very reasonable costs, "why buy what you don't need?" Our Reports give you precisely what you need on a monthly or weekly basis, in clean crisp detail down to the penny. We have a track record of managing over 8 billion in CIP programs including vertical, horizontal, CMR, design build, managed the **1.6 Billion $ Houston Metro Rail** , over 2800 1st, 2nd, 3rd tier suppliers, construction, professional services, with a 97% retention rate with 6 DBE's graduating out of the program. We have experience with the Houston Community College Bond, The Houston Independent School District Bond, VIA, and BART, all projects met or exceeded a 100% compliance benchmark.

- Technical Assistance Activities
- Workforce Training Reports
- Actual/Potential Disputes
- Earned and Value Reports

We specialize in "noise reduction", Stakeholder management, risk management outreach events, and reporting, workforce development, training small businesses, seminars regarding becoming bankable and bondable to do business with Government. **PPG** uses our proprietary online system, **Supply Chain Procurement Management System (SCPMS)** which is designed to assist with tracking, compliance monitoring and reporting from the **outreach phase through the closeout phase**. Additionally, the **SCPMS** tracks awarded contracts (on all tier levels), invoices and payments made toward these contracts. By collecting this data we are able to track awarded and actual small business participation, as well as forecast small business achievement probability towards meeting its contractual amount. We have the ability to customize or standardize our reports at any level of specificity based on our clients' needs. This can be done on an enterprise basis and to cover multiple reporting agencies or entities that would need to be reported as part of an enterprise reporting system. We have experience in doing this with the government (local, state and federal branches), grant funded projects as well as public-private partnerships. Please call me directly at 713-527-0702 or email me @ dk@theppgllc.com. We'll customize a program for you.
